

French producer of natural active ingredients  
for over 20 years

Since  
1998

## About us

Actichem is a French family company.

Since 1998, we have been developing and producing natural active ingredients from grapevine extracts standardized in Resveratrol monomers and oligomers for cosmetic and nutraceutical markets.

We have patented a unique extraction process of Resveratrol and its derivatives from vine.

Our values are based on **innovation and quality, driven by a family spirit** to give the **best service to our customers.**

## Our ingredients

The raw materials used to produce our active ingredients are harvested exclusively in the famous French vineyards. We use the **renewable** part of the grapevines:

- vine shoots, pruned every year in winter
- vine roots, harvested during natural vine renewal

Our **high quality** and **sustainably produced** ingredients are manufactured in France using our unique know-how.

We manage the harvesting and extraction stages. Manufacturing and control are carried out locally, allowing for real traceability and quality assurance.

# RESVERATROX<sup>®</sup>

## **Cosmetic range**

**Main active molecules:** Resveratrol monomers and oligomers

**Applications:** Skin care - Healthy aging and anti-pollution

The RESVERATROX<sup>®</sup> range was launched on the healthy aging market in 2006. This year, the product was presented during the IFSCC congress in Osaka, Japan. Our vine shoot extract range shows remarkable results in clinical and technical studies for:

- Antioxidant activity
- Wrinkle reduction
- Anti-elastase activity
- Anti-pollution properties
- Mature skin rejuvenation
- Overall improvement of acne-prone skin

# VINIFEROL<sup>®</sup>

## **Cosmetic range**

**Main active molecule:** Epsilon-Viniferin

**Applications:** Body care - Slimming

The VINIFEROL<sup>®</sup> range was presented in 2006 during the international conference on Polyphenols in Winnipeg, Canada.

VINIFEROL<sup>®</sup> is made of grapevine shoot extract. Outstanding results were obtained during technical and clinical studies on this range for:

- PDE4 inhibition
- Firmness
- SIRT1 activation
- Smooth skin

# VITISIN<sup>®</sup>

## **Cosmetic range**

**Main active molecules:** Vitisin A and Vitisin B

**Applications:** Skin Care - Skin lightening

Patented and launched in 2008, the VITISIN<sup>®</sup> range was a new tyrosinase inhibitor on the skin lightening market at the time. Our vine root extract range has shown excellent results during technical and clinical studies for:

- Tyrosinase inhibition
- Skin lightening
- Reduction of age spots

# VINEATROL®

## Nutraceutical range

**Main active molecules:** Resveratrol monomers and oligomers

**Applications:** Dietary supplement

VINEATROL® was our first range and was launched in 1999, only one year after we patented our unique extraction process. Our product is standardized in Resveratrol monomers and oligomers; these natural molecules, which are well-known for their health benefits, are found in red wine. VINEATROL® shows multiple results for:

- Memory improvement
- Cardio-protection
- Healthy aging
- Anti-inflammatory & antioxidant activities

## We can bring you ..

Expertise in raw material sourcing and management

Customized projects with grapevines from specific vineyards

Over 20 years of experience

Customized standardizations of our ingredients

Proprietary patents for extraction process and biological activities

Unique know-how in identification and quantification of Resveratrol derivatives

Efficacy studies and various benefits for each ingredient

Continual innovation and R&D
